

# Safe Harbor and Disclaimers

Other than statements of historical fact, all information contained in these materials and any accompanying oral commentary (collectively, the “Materials”), including statements regarding (i) Snowflake’s business strategy, plans or priorities, (ii) Snowflake’s new or enhanced products, services, and technology offerings, including those that are under development or not generally available, (iii) market growth, trends, and competitive considerations, (iv) our vision for Snowpark, the Data Cloud, and industry-specific Data Clouds, including the expected benefits and network effects of the Data Cloud; and (v) the integration, interoperability, and availability of Snowflake’s products, services, or technology offerings with or on third-party platforms or products, are forward-looking statements. These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described under the heading “Risk Factors” and elsewhere in the Annual Reports on Form 10-K and the Quarterly Reports on Form 10-Q that Snowflake files with the Securities and Exchange Commission. In light of these risks, uncertainties, and assumptions, the future events and trends discussed in the Materials may not occur, and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements. As a result, you should not rely on any forwarding-looking statements as predictions of future events. Forward-looking statements speak only as of the date the statements are first made and are based on information available to us at the time those statements are made and/or management’s good faith belief as of that time. Except as required by law, we undertake no obligation, and do not intend, to update the forward-looking statements in these Materials.

Any future product or roadmap information (collectively, the “Roadmap”) is intended to outline general product direction. The Roadmap is not a commitment, promise, or legal obligation for Snowflake to deliver any future products, features, or functionality; and is not intended to be, and shall not be deemed to be, incorporated into any contract. The actual timing of any product, feature, or functionality that is ultimately made available may be different from what is presented in the Roadmap. The Roadmap information should not be used when making a purchasing decision. In case of conflict between the information contained in the Materials and official Snowflake documentation, official Snowflake documentation should take precedence over these Materials. Further, note that Snowflake has made no determination as to whether separate fees will be charged for any future products, features, and/or functionality which may ultimately be made available. Snowflake may, in its own discretion, choose to charge separate fees for the delivery of any future products, features, and/or functionality which are ultimately made available.

The Materials may contain information provided by third-parties. Snowflake has not independently verified this information, and usage of this information does not mean or imply that Snowflake has adopted this information as its own or independently verified its accuracy.

# MODERNIZE YOUR DATA PLATFORM

# KNIME Business Hub + Snowflake → Production++

# KNIME Business Hub + Snowflake → Production++

# The Easy, Connected, and Trusted Data Foundation to Accelerate Enterprise-Ready Data & AI

## Easy

Save time and money with a single fully managed platform for all workloads that is scalable, self-improving and has built-in FinOps for optimal cost efficiency

## Connected

Accelerate decision-making and unlock new opportunities with an open architecture that provides direct access to the most complete ecosystem of AI-ready data, apps and agentic products

## Trusted

Protect your assets and brand reputation by reducing risks with enterprise grade security, governance, observability and business continuity/disaster recovery across regions and clouds

**Accelerated Time to Data & AI Innovation**

# The Snowflake Platform: Your **Easy** to Use Data Foundation

## Fully Managed, Single Product for All Your Workloads

Enjoy one simple product for all data and AI across analytical, hybrid and transactional workloads that works out-of-the-box without manual tuning, maintenance or downtime for upgrades

## Powerful Scalability

Effortlessly scale up or down compute resources with leading user concurrency

## Manageability at Scale

Efficiently manage all associated accounts across an organization at scale

## High Performance, Extensible Compute

Benefit from regular, automatic performance improvements for 2x\* faster warehouses. Easily extend Snowflake to any workload with Snowpark Container Services

## Unified FinOps

Gain visibility, control and optimization of Snowflake spend in one Cost Management interface or through SQL

# The Snowflake Platform: Your **Connected** Data Foundation

## Ultimate Cross-Cloud Openness & Interoperability

Access and process structured, semi-structured, unstructured or open data seamlessly across regions and clouds, connect to any system, and work with your engine of choice. Snowflake continuously leads open source contributions to Apache Iceberg™, Apache Polaris™ (incubating), Apache Nifi™ and the Open Semantic Interchange to enhance interoperability without vendor lock-in

## Seamless Cross-Cloud Data Sharing

Instantly and securely exchange live data, apps and agentic products with partners, suppliers and teams across regions and cloud without complex, costly data movement

## Secure Internal and External Collaboration

Remove organizational and technical silos by easily finding, accessing and procuring data, apps and AI products from inside and outside your organization

# The Snowflake Platform: Your **Trusted** Data Foundation

## Built-in Snowflake Horizon Catalog

Get the universal AI Catalog that provides context and governance for AI over all data. It works across native Snowflake objects, data in open table formats (Iceberg, Delta) that can be read/written by any engine and data in relational databases (like SQL Server, Postgres)

## Built-in Business Continuity/Disaster Recovery

Safeguard mission-critical accounts and datasets to maintain uptime with seamless replication and synchronization of objects between regions and clouds

## Built-in Observability

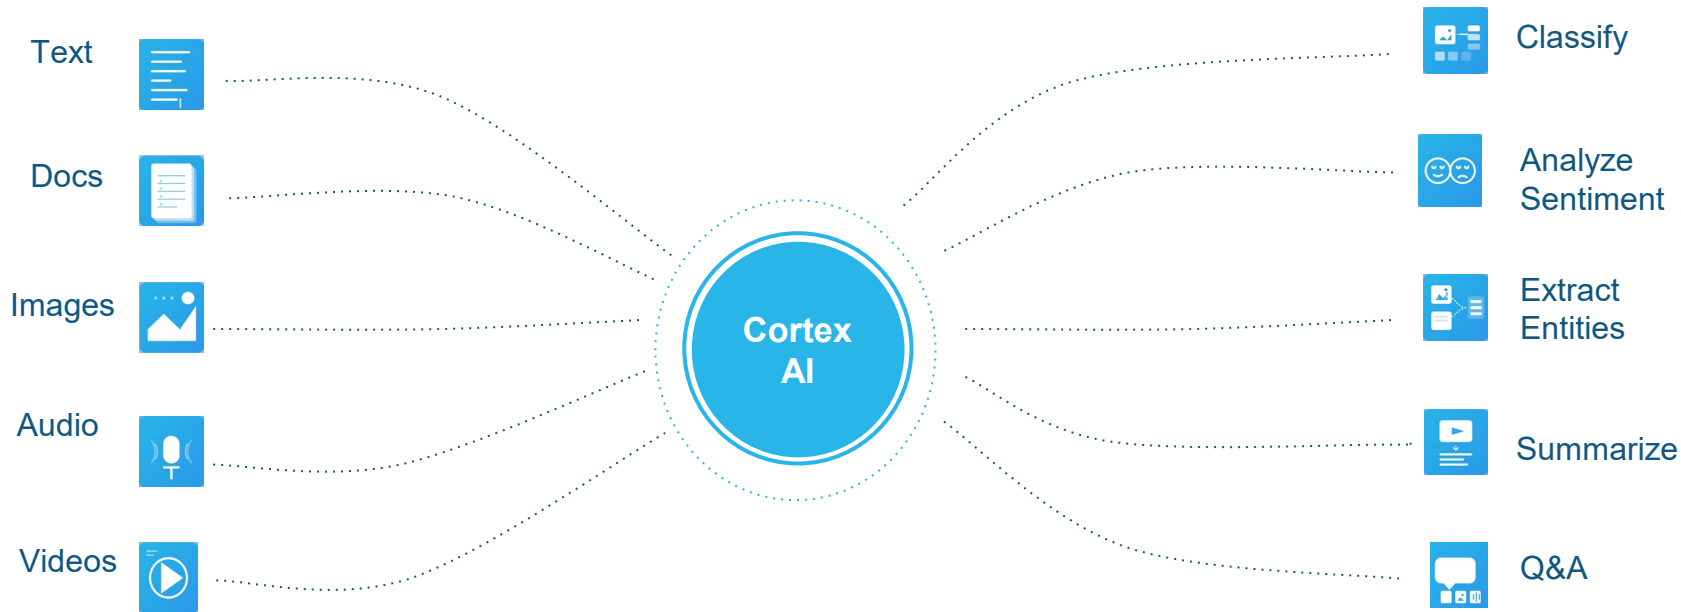

Demystify AI, accelerate troubleshooting for apps and pipelines and optimize infrastructure through comprehensive visibility

# EXTEND DATA PLATFORM

# Customers want to easily get value from all data.

Any data input

## Optimize Marketing

EXPERIENCE  
THE SOUND

WIRELESS  
HEADPHONES

Use image similarity to A/B test visual creatives and correlate conversion with image attributes, or identify top-performing visual themes from user content

## Streamline Processes

Easily extract image metadata and generate descriptions to turn into searchable insights and automate manual tagging.

## Enhance Customer Service

Transcribe and summarize support calls to detect customer sentiment and classify themes to improve operations and agent service.

## Analyze Complex Documents

Extract data from text, tables, and chart descriptions into a structured outputs to validate data from various documents.

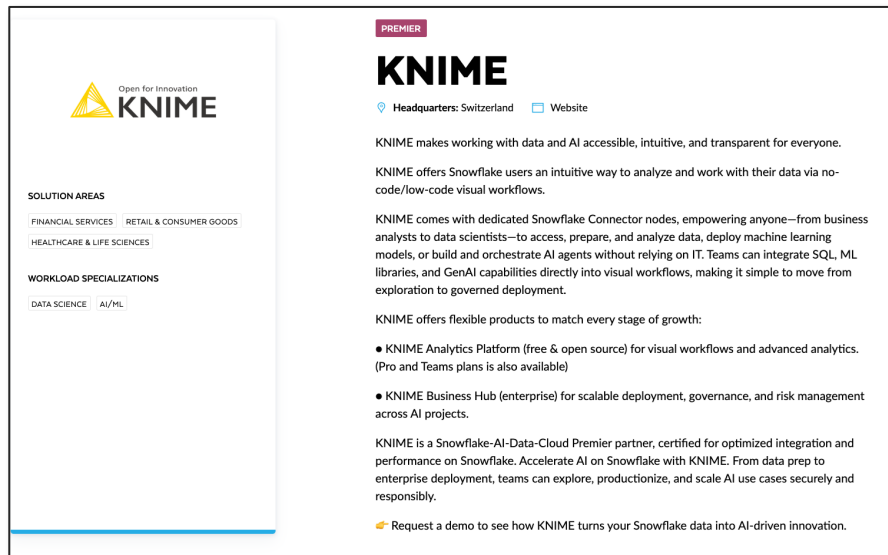

# MODERN DATA PLATFORM IS REAL

# Better Together

We are Partners; KNIME Snowflake Extension Guide is there for you

The screenshot shows the KNIME website homepage. At the top left is the KNIME logo with the tagline "Open for Innovation". Below the logo are sections for "SOLUTION AREAS" and "WORKLOAD SPECIALIZATIONS". The "SOLUTION AREAS" section lists "FINANCIAL SERVICES", "RETAIL & CONSUMER GOODS", and "HEALTHCARE & LIFE SCIENCES". The "WORKLOAD SPECIALIZATIONS" section lists "DATA SCIENCE" and "AI/ML".

**PREMIER**

## KNIME

📍 Headquarters: Switzerland 🌐 Website

KNIME makes working with data and AI accessible, intuitive, and transparent for everyone.

KNIME offers Snowflake users an intuitive way to analyze and work with their data via no-code/low-code visual workflows.

KNIME comes with dedicated Snowflake Connector nodes, empowering anyone—from business analysts to data scientists—to access, prepare, and analyze data, deploy machine learning models, or build and orchestrate AI agents without relying on IT. Teams can integrate SQL, ML libraries, and GenAI capabilities directly into visual workflows, making it simple to move from exploration to governed deployment.

KNIME offers flexible products to match every stage of growth:

- KNIME Analytics Platform (free & open source) for visual workflows and advanced analytics. (Pro and Teams plans is also available)
- KNIME Business Hub (enterprise) for scalable deployment, governance, and risk management across AI projects.

KNIME is a Snowflake-AI-Data-Cloud Premier partner, certified for optimized integration and performance on Snowflake. Accelerate AI on Snowflake with KNIME. From data prep to enterprise deployment, teams can explore, productionize, and scale AI use cases securely and responsibly.

👉 Request a demo to see how KNIME turns your Snowflake data into AI-driven innovation.

## KNIME Snowflake Extension Guide

### Introduction [🔗](#)

This guide describes how to work with Snowflake from within the KNIME Analytics Platform. The KNIME Analytics Platform is our open source software for creating data science. Intuitive, open, and continuously integrating new developments, it makes understanding data and designing workflows and reusable components accessible to everyone.

The Snowflake Extension allows you to connect to your Snowflake account to access and manage data directly in Snowflake and if desired sprinkle in some SQL. You can combine data from Snowflake with data from any of the multiple sources supported by KNIME and apply advanced techniques such as statistics, machine learning, model monitoring, and artificial intelligence to make sense of it.

KNIME is a [Snowflake Ready Technology](#), having completed a 3rd party technical validation that confirms the KNIME Snowflake Integration is optimized with an emphasis on functional and performance best practices.

### Build a Churn Predictor with Snowflake and KNIME

May 18, 2022

ML 101

As first published by *Snowflake*

Data Manipulation, Analysis and Visualization for Everyone

# Quick Start

The screenshot shows the Snowflake Intelligence website landing page. At the top, there is a navigation bar with the Snowflake logo on the left and menu items: Product, Solutions, Why Snowflake, Resources, Developers, and Pricing. On the right side of the navigation bar, there is a globe icon, a 'Sign in' link, a 'CONTACT SALES' button, and a 'START FOR FREE' button. The main content area has a light blue background with a large heading: 'THE AI DATA CLOUD' followed by 'ALL YOUR KNOWLEDGE. ONE TRUSTED ENTERPRISE AGENT.' Below this is a sub-headline: 'Turn enterprise data into instant insights with Snowflake Intelligence.' A large white rounded rectangle contains a text input field with the question 'What were the top 3 complaints from support tickets last week?'. Below the input field are two buttons: 'Store Insights' and 'Sources: Auto'. To the right of these buttons are two circular icons: a graduation cap and a microphone. At the bottom of the page, there is a blue button that says 'LEARN MORE ABOUT SNOWFLAKE INTELLIGENCE' and a link that says 'READ THE ANNOUNCEMENT BLOG >'.
