

KNIME for Educators

Explore
the Kits for Educators

Teach data science with KNIME using the three new Kits for Educators.

Each Kit is geared to a different teaching or learning setup: Including additional resources for instructors, gamified learning, and collaboration opportunities for teaching and research. The Kits are available to members of the [Educators Alliance](#).

- **Education Kit**
- **Gamification Kit**
- **Collaboration Kit**

- Educational material from [all KNIME courses and workshops](#) (slides, examples, and exercises)
- Free book downloads from [KNIME Press](#)
- Free [certification exams](#) for all levels
- Guest lectures on specific topics

Education Kit

For lecturers and educators

"From an educational perspective, KNIME offers a great opportunity to really practice theoretical concepts."
Keith McCormick, Educator and author

Gamification Kit

For the students

"KNIME makes the learning more accessible, and sometimes also more fun."
Andrea De Mauro, Educator and author

- Weekly [Just KNIME It!](#) challenges to help students practice and improve their skills
- Access to *Just KNIME It!* Study Groups around the world for technical discussions and thought sharing
- Joint learnathons and hackathons, both onsite or online
- Jointly organized internal [Student Challenges](#) including awards and social media visibility

- Joint work on dedicated [KNIME Hub](#) space to collect solutions
- Support for article publication in technical and research blogs and journals
- Publication of your article(s) in a KNIME Press book
- Development of a new node/extension
- Co-hosting of a Data Connect event

Collaboration Kit

For publishers of articles,
and data science solutions

"Even at this level of complexity, the workflow structure helps me communicate the work to non-programmers."
Malik Yousef, Head of the Galilee Digital Health Research Center, Israel.
