

Senior Software Engineer – Java/Big Data

KNIME has landed in the startup-capital of Germany! We at KNIME.com design and develop software modules for the open-source KNIME Analytics Platform as well as consult and support customers with their enterprise KNIME applications.

KNIME is the leading open platform for data-driven innovation helping organizations to stay ahead of change. Innovative organizations use our open-source, enterprise-grade analytics platform to discover the potential hidden in their data, mine for fresh insights, or predict new futures.

We have an immediate opening for a Senior Software Engineer with experience programming in a Big Data environment, to support our team in Berlin. Your task is to advance the Big Data strategy for KNIME. The key issues here involve developing easy to scale, high-performance solutions for the execution of KNIME workflows on Big Data frameworks and integrating existing Big Data tools, e.g. Hive, Impala and Spark in KNIME Analytics Platform.

What you can expect:

- An influential role in developing the Big Data strategy for KNIME.
- Conceptual design and development of an execution engine for KNIME based on existing Big Data frameworks.
- Further development of KNIME Analytics Platform.
- Flexible working hours and a competitive salary.
- The opportunity to be part of an aspiring, innovative company.
- The chance to explore further interesting areas of work, including analytics projects, user trainings, etc.

What you need for this position:

- A degree in computer science or comparable subjects.
- Experience administrating, developing and integrating Big Data tools and frameworks (Hadoop, HBase, HDFS, Hive, Spark, Tez, YARN, etc.).
- Excellent knowledge of Java and Eclipse.
- Experience and knowledge of software development (object-oriented methods, algorithms and data structures, database systems, frameworks).
- An independent, structured and diligent way of working.
- Commitment to continuous learning and a passion for new technologies.

Have we sparked your interest? Send an email to berlin@knime.com and become part of the Berlin KNIME Team.

We look forward to receiving your application!
